## ABSTRACT

### IMPLEMENTATION OF SMART CARDS IN DATABASE SYSTEMS FOR AUTHORIZED ACCESS TO SGU ROOM MODEL

By

SWISS GERMAN UNIVERSITY

Bumi Serpong Damai

Dipl. -Ing. Maralo Sinaga

Stand alone smart card system is the main topic of this thesis. This system connects between a contactless smart card reader and the microcontroller as the main controller device using a serial interface and the communication will be monitored in data terminal program. It will give an authorization to access the room by comparing the smart card data such as identification number of the SGU students to the database in the microcontroller. The system is added with keypad to input personal identification number (PIN) in order to provide higher level of security system. The LCD is an additional device to display the process that is done in the system.

To support the main system, the registration process is needed in order to write the identification number into the contactless blank smart card. In this registration process, it is also possible to read the data on the smart card. The registration process is done by the PC with connecting to the contactless smart card reader using also the serial interface.

Keywords: LCD, RFID, Contactless Smart Card, Physical Access, Data Terminal

## DEDICATION

I dedicate this thesis to Jesus Christ who gives me strength and makes everything possible, to my beloved family especially for my mom and dad and my girlfriend who always supported me. Thank you for all the support, advised. Without their support this thesis would not be completed.

My friends Darius Leander Nilam Tjioe, Albertus Dipo Radityo, Andrew Tirtawidjaja, Hadi Sanjaya and Putu Agus Santika, thank you for all the support and those fun that we had. Thank you for those wonderful times that we have been through.

## ACKNOWLEDGMENTS

First of all, I would like to offer my gratitude to Jesus Christ for His loving, kindness and amazing grace, so I can carry on even in the darkest hour. This thesis would not be finished without His compassion.

I also would like to thank my advisor, Dipl. –Ing. Maralo Sinaga for the continuous support in completing my thesis, for his assistance, motivation, patience and excellent knowledge. He helps me a lot in doing my research and writing this thesis.

To all my mechatronics friends who work together with me in the Swiss German University every day, I would like to thank them for the helpful discussion, for our unforgettable moment in working the thesis at sleepless nights before deadline and for all of the fun we have ever had in the last four years.

The last acknowledgement is dedicated to my parents, for their support in everything I do, and their biggest devotion for me to teach me the best thing, so I can be a better person.

## TABLE OF CONTENTS

STATEMENT BY THE AUTHOR.....	2
ABSTRACT .....	3
DEDICATION .....	4
ACKNOWLEDGMENTS .....	5
CHAPTER 1 – INTRODUCTION .....	12
1.1 General Statement of Problem Area.....	12
1.2 Project Objective .....	13
1.3 Project Scope .....	13
1.4 Thesis Limitation .....	13
1.5 Methodology.....	14
1.6 Thesis Structure .....	14
CHAPTER 2 – LITERATURE REVIEW .....	16
2.1 Introduction to Literature Review.....	16
2.2 Physical Security in access control .....	16
2.3 Access Codes .....	19
2.4 Biometrics.....	20
2.5 Smart Card Technology Review.....	24
2.5.1 Smart Card Introduction.....	24
2.5.2 Smart Card Elements.....	25
2.5.3 Single Function Cards.....	26
2.5.4 Multi – Function Cards .....	26
2.5.5 Contact – Based Smart Card .....	26
2.5.6 Contactless Smart Card.....	28
2.5.7 Contact-Based Smart Card Reader .....	28
2.5.8 Contactless Smart Card Reader .....	29
2.5.9 Smart Card Operating Systems .....	30
2.5.10 Smart Card File Management.....	30
2.6 Smart Card application .....	32
2.6.1 Identification.....	32
2.6.2 Physical Access Control .....	33

2.6.3	PC and Systems Access.....	34
2.6.4	Banking.....	34
2.6.5	Medical .....	35
2.6.6	Other Value-Added Services .....	35
2.7	Concluding Remarks .....	36
CHAPTER 3 – METHODOLOGY .....		37
3.1	Introduction.....	37
3.2	Study of Smart Card Technology .....	38
3.2.1	Smart Card Based Service .....	38
3.2.2	Contactless Smart Card Reader .....	42
3.2.3	Communication Principle .....	44
3.3	Registration Design .....	46
3.4	Stand Alone Smart Card System Design.....	52
3.4.1	Database Design .....	53
3.4.2	Communication Protocol.....	54
3.4.3	Microcontroller .....	56
3.4.3.1	Microcontroller Input / Output Pins Configuration.....	64
3.4.4	Keypad.....	65
3.4.5	LCD Information Display System .....	66
3.5	Electrical System Design.....	69
3.5.1	Electrical Wiring Schematic .....	69
3.5.2	Motor Driver .....	70
3.5.3	Proximity Sensor.....	71
3.6	Mechanical Design .....	72
3.7	Concluding Remarks .....	74
CHAPTER 4 – RESULT & DISCUSSION.....		75
4.1	Introduction.....	75
4.2	Smart Card Registration Result .....	75
4.3	Stand Alone Smart Card System Testing and Result.....	80
4.4	Mechanical Result .....	92
4.5	Concluding Remarks .....	94
CHAPTER 5 – CONCLUSION AND RECOMMENDATION .....		95
GLOSSARY.....		96
