Many IT services companies do not have any opportunity assessment technique that helps in choosing the right project. In order to properly evaluate and decide right projects, it is essential to consider both financial and non-financial factors, such as total cost, implementation time, benefits, risks, strategic fitness, function and technology, vendor's ability, and vendor's reputation (Wei and Wang, 2004a). Thus, conducting a feasibility analysis of the opportunity involving complex evaluation factors in relation with project management is a kind of multiple criteria decision-making problem (Arrey, 2015)(Chakraborty and Yeh, 2007)(Wang and Hsu, 2007). To better accommodate the feasibility analysis with respect to the project function groups, the decision criteria is developed by the derivatives of knowledge areas from the Project Management Body of Knowledge (PMBOK). This research then uses automatic weighting process of decision criteria based on projects' trace, estimates using a prediction model and based on these criteria and weighting, a framework of conducting feasibility analysis is proposed, using the advantage of Analytical Hierarchy Process (AHP). The findings of this research shows that the result of this framework is consistent with the expert judgment of deciding whether the opportunity of projects should be taken or rejected by the company.

to all families and friends

ACKNOWLEDGEMENTS

Allah subhanahu wa ta'ala. Alhamdulillah rabbi 'alamin.

Allahuma shalli wa sallim 'ala Muhammad wa 'ala ali Muhammad.

Foremost, I would like to express my sincere gratitude to my advisors Dr. Ir. Moh. A. Amin Soetomo, M.Sc. and Dr. Ir. Gembong Baskoro, M.Sc. for the continuous and endlessly support of my study and research, for their patience, motivation, enthusiasm, and immense knowledge. Their guidance helped me in all the time of research and writing of this thesis.

Besides my advisors, I would like to thank to all project managers in Telkomsigma who involved in the process of developing the framework written in this thesis for their insightful comments and hard feedbacks.

Last but not least, I would like to pay high regards to my beloved Mom, my dearly beloved Silvia, and all families for their sincere spiritually support and inspiration throughout my research.

Besides this, several people have knowingly and unknowingly helped me in the successful completion of this thesis.
