## ABSTRACT

AUTOMATED GUIDED VEHICLE (AGV)  
DESIGN, DEVELOPMENT & PROTOTYPING  
FOR MATERIAL HANDLING EQUIPMENT  
WITH SYSTEM ENGINEERING APPROACH

SWISS GERMAN UNIVERISTY

There is no methodology that fit every possible situation and acceptable globally said by one of the Systems engineering guru named Kossiakoff. This thesis tries to develop a methodology that suitable for developing Automated Guided Vehicle (AGV) as it System of Interest (SoI) in the university environment. The methodology takes reference from the famous Vee-Modell System Development, NASA System Design Processes Relationship and Model-Based System Engineering Approach. The Methodology name is RELI System Design Methodology (RELI) which has tagline "The System Design you created is Reconfigurable, The Methodology you followed is Linear". Inside there are explanation of defining operational concept (OpsCon) using use case diagram, capture & modify existing system design solution with composite association and generalization relationship of block definition diagram and creating Functional Architecture with SysML internal block diagram. System engineering truly help the realization process of AGV however it should be carried out with the ability to scope and freeze the possible work to be done in the context of overall goal & limitation.

*Keywords: System Engineering, RELI System Design Methodology, Vee-Model, Kossiakoff, Model-Based System Engineering, NASA System Design Processes Relationship, SysML.*

## **DEDICATION**

I dedicate this thesis to my Mum, Dad, Brother, Advisor, Fellow Students and You

## ACKNOWLEDGEMENTS

First I would like to give appreciation and thankfulness to my mum, dad and big brother who always wanted me to finished my bachelor degree and see me graduate especially my mum Estu D. Winarni who came over and personally gave assistance and made sure that I keep on the *right* track.

Next, I would like to acknowledge my thesis advisor; co-advisor and lecturers that help me both in the technical and non-technical aspect of this thesis work especially my thesis advisor Ir. Invanos Tertiana, MBA who have the patience to not give the direct answers but guide through hints, clues and analogies.

Next, I would like to acknowledge fellow students of Industrial Engineering batch 2010 who already graduated before and asked me when I would like to join them and batch 2012 especially those included in Infiniti Group Project for showing fun and energize environment.

Next, I would like to give credits to those whose works has been cited, referenced and/or inspired be it organizations or gurus that makes me understand a bit about Systems Engineering principle especially Forsberg, Kossiakoff, Delligatti, Friedenthal, Gentry Lee, NASA, INCOSE, OMG & PMI.

Last but not least, I would like to give appreciation to you who already give the effort to open up my works and read until the bottom of acknowledgement section or even until the last page of this thesis work.

## TABLE OF CONTENTS

	Page
STATEMENT BY THE AUTHOR.....	2
ABSTRACT.....	3
DEDICATION.....	5
ACKNOWLEDGEMENTS.....	6
TABLE OF CONTENTS.....	7
LIST OF FIGURES.....	11
LIST OF TABLES.....	13
CHAPTER 1 - INTRODUCTION.....	14
1.1 Background.....	14
1.2 Problem Statement.....	15
1.3 Objective Statement.....	15
1.4 Hypothesis.....	15
1.5 Thesis Scope.....	15
1.6 Thesis Limitation.....	15
1.7 Significance of Study.....	15
1.8 Thesis Structure.....	16
CHAPTER 2 - LITERATURE REVIEW.....	17

---

---

2.1	Literature Review Part Initial Exploratory Research .....	17
2.1.1	Systems Engineering .....	18
2.1.1.1	Systems-Engineering Lifecycle (SEL) .....	19
2.1.2	Project Management .....	25
2.1.2.1	Project Charter .....	25
2.1.2.2	Work Breakdown Structure .....	26
2.1.2.3	Project Cycle .....	26
2.1.3	Material Handling .....	26
2.1.4	Automated Guided Vehicle .....	26
CHAPTER 3	- RESEARCH METHODOLOGY .....	28
3.1	RELI System Design Methodology .....	28
3.1.1	Initiating Process Group (IPG) .....	31
3.1.2	Planning Process Group (PPG) .....	31
3.1.3	Executing Process Group (EPG) .....	32
3.1.4	Monitoring & Controlling Process Group (MCPG) .....	33
3.1.5	Closing Process Group (CPG) .....	34
CHAPTER 4	- RESULTS AND DISCUSSIONS .....	35
4.1	Initiating Process Group .....	35
4.1.1	Initiating Project with Project Charter .....	35
4.2	Planning Process Group .....	36
