## ABSTRACT

### DEVELOPMENT OF WAREHOUSE MANAGEMENT SYSTEM (WMS) TO IMPROVE WAREHOUSING OPERATION AT THIRD-PARTY LOGISTIC COMPANY (CASE STUDY AT PT. MULTISARANA BAHTERAMANDIRI)

SWISS GERMAN UNIVERISTY

This research purpose is to develop a WMS for PT. Multisarana Bahteramandiri (PT. MB) using system development life cycle to guide throughout the research work and system-design v-model methodology to provide guide for design phase of WMS. PT. MB is a local third party logistic service provider based at Bekasi, Indonesia providing multiple logistic services, in which currently the warehousing service is the biggest contributor of the company total revenue. Recently, the inquiry of WMS availability is increasing either from existing customer or prospective customer, often that prospective customer choose a warehouse service provider who provides WMS, a proof that PT. MB is falling behind another competitor. Then the idea to develop WMS in purpose to increase the competitiveness in the market place is initiated.

Throughout this research, it concludes that WMS will significantly improve the warehousing operation in term of shortening lead time and providing real-time customer information sharing process which expected to increase the competitiveness of the company.

*Keywords: Warehouse Management System, Warehousing, Third-Party Logistic, System Development Life Cycle, System Design, Service Oriented Architecture, System Modelling and Simulation*

## DEDICATION

*To the One and Only Allah SWT and the Prophet Muhammad SAW*

*To my beloved family for their endless support and inspiration*

*To my fellow friends for their motivation*

*And to anyone who might benefit from this thesis*

## ACKNOWLEDGEMENTS

First of all, I want to thank God for His blessing that enables me to complete this thesis.

Second, I wish to thank Mr. Invanos Tertiana as the advisor for this thesis project, whom with his expertise constantly challenging and directing the guidance throughout the completion of this thesis and to Ms. Tanika D. Sofianti as the co-advisor of this thesis work for her support and very valuable insights.

Third, the sincere appreciation for PT. Multisarana Bahteramandiri for a great learning chance and also for their collaboration and guidance throughout the thesis work which was very valuable and helpful.

Lastly, I would like to express my gratitude to industrial engineering batch 2009 students for the collaborative and challenging environment that keeps motivate me to complete this thesis.

## TABLE OF CONTENTS

STATEMENT BY THE AUTHOR.....	2
ABSTRACT.....	3
DEDICATION.....	5
ACKNOWLEDGEMENTS.....	6
LIST OF FIGURES.....	10
LIST OF TABLES.....	12
CHAPTER 1 – INTRODUCTION.....	13
1.1 Background.....	13
1.2 General Statement of Problem Area.....	16
1.3 Research Problem.....	16
1.3.1 Research Questions.....	16
1.4 Research Purpose.....	16
1.5 Research Scope.....	17
1.6 Content Structure.....	17
CHAPTER 2 - LITERATURE REVIEW.....	18
2.1 Supply Chain.....	18
2.1.1 Logistic.....	19
2.1.2 Third-Party Logistics (3PL).....	20
2.1.3 Warehousing.....	21
2.1.3.1 Warehousing Parameters.....	22
2.2 Inventory.....	22
2.2.1 Inventory Information.....	23
2.2.2 Inventory Monitoring and Measurement.....	24
2.3 Enterprise Information System (EIS).....	24
2.3.1 Warehouse Management System (WMS).....	25
2.3.1.1 Classification of WMS.....	25
2.3.1.2 Categories of WMS.....	26
2.3.1.3 WMS Technologies.....	27
2.3.2 The Rea Enterprise Ontology.....	28
2.3.3 Data Flow Diagram (DFD).....	28

2.4 System Engineering.....	29
2.4.1 System Development Life Cycle (SDLC).....	31
2.4.2 Service-Oriented Architecture (SOA) .....	33
2.4.3 System Modelling and Simulation .....	37
2.5 Change Management.....	37
2.5.1 Leavitt’s Diamond .....	37
2.5.2 Davi’s Technology Acceptance Model (TAM).....	38
CHAPTER 3 - METHODOLOGY .....	40
3.1 WMS Development Methodology .....	40
3.1.1 Phase 1 - Planning .....	40
3.1.2 Phase 2 - Analysis.....	42
3.1.3 Phase 3 - Design .....	43
3.1.4 Phase 4 - Development .....	44
3.2 WMS V-Model Methodology .....	45
CHAPTER 4 – RESULT & DISCUSSION.....	49
4.1 Business Requirements .....	49
4.2 WMS SOA .....	51
4.2.1 Enterprise Layer Architecture .....	51
4.2.2 WMS SERVICE ORIENTED ARCHITECTURE (SOA).....	52
4.3 WMS ERD .....	55
4.4 WMS DFD .....	56
4.5 WMS Process Modelling .....	59
4.5.1 Inbound Logistic .....	59
4.5.1.1 Prepare space allocation based on delivery plan (current).....	60
4.5.1.2 Prepare incoming tally sheet (current).....	60
4.5.1.3 Prepare space allocation based on delivery plan (expected) .....	61
4.5.1.4 Prepare incoming tally sheet (expected).....	61
4.5.2 Outbound Logistic .....	63
4.5.2.1 Prepare cargo for delivery based on delivery plan (current).....	64
4.5.2.2 Prepare outgoing tally sheet (current).....	65
4.5.2.3 Prepare cargo for delivery based on delivery plan (expected)..	66
4.5.2.4 Prepare outgoing tally sheet (expected).....	66

4.5.3 Stock Counting .....	68
4.5.4 Inspection.....	70
4.6 Benefit Measurement Result .....	72
4.6.1 Inbound Logistic .....	72
4.6.2 Outbound Logistic .....	74
4.6.3 Stock Counting .....	75
4.6.4 Inspection.....	76
4.8 Development Roadmap .....	77
4.8.1 WMS Development Method.....	77
4.8.2 WMS Functions Definition .....	77
4.8.3 WMS function and service matrix .....	78
4.8.4 Application Function .....	79
CHAPTER 5 – CONCLUSION & RECOMMENDATION .....	82
5.1 Conclusion.....	82
5.2 Recommendation.....	83
GLOSSARY .....	84
References.....	85
