ABSTRACT

Human Error Analysis to Improve Patient Safety in Hospital Using Human Factor
Analysis and Classification System: Study at RS Medika Lestari

Tanika D. Sofianti, ST,MT, Thesis Co-Advisor

Every hospital in this world has the same main objective which is patient safety. However, there are a few things that can endanger the patient intentionally or unintentionally. Keeping Patient safety itself is not solely doctors and nurses job, it can be influenced from other aspects like organization, environment, management, etc. To increase patient safety in RS Medika Lestari, potential error from several aspects need to be reduced. Human factor analysis and classification system methodology is used to find the potential error in RS Medika Lestari. Gap analysis and fish bone diagram are developed to propose the improvement that might be useful for patient safety. A business process modelling is made as a standard procedure for routine activities at RS Medika Lestari based on the hospital procedure in hospital in order to increase patient safety.

Keywords: Patient Safety, human error, Business process modelling, Human factor analysis and classification system

DEDICATION

I dedicate this work to my parents,
who have supported me materially and spiritually,
and my friends who have cheered me through this semester.

ACKNOWLEDGEMENTS

Foremost I would like to express the highest praise to the almighty Allah SWT for all strengths and blessings throughout the completion of this thesis.

My deepest gratitude to Ir. Triarti Saraswati, M.Eng and Tanika D. Sofianti, ST,MT for all valuable guidance, suggestion, and supports during the creation of this thesis. I would like also to thank to all the lecturers that already share their knowledge in the past four years.

This thesis will not be completed without my friend Antonius Timothy Soerianto who helped me asking his uncle to get permission doing this research in his hospital, also I thank all the management, doctors, nurses and staffs in RS Medika Lestari Ciledug.

My time in Swiss German University from semester 1 until semester 8 would not be fun and colorful without the presents of my friends in Industrial Engineering 2010 and all my friends in other department.

Thanks to Annisa Hakim, Bramantyo Wicaksono, Christian Natasaputra, Christian Michael Reza, Harwin Kurniawan, Harsyadi Adhiarsa, Iman M. Annas, Johannes Nikolas Japar, Jonathan Marshall Kevin, Kelvin Recia, Mascellia Tifanny Agung, Nikolaus Kris Abimontro, Paramitha Avianti Dika and Ruth Damayanti Setiono for the great time that we have been through together in Germany and Indonesia.

Last but not least, the accomplishment of this thesis will be impossible without the support, love and pray from my father, mother, sisters and my family. I will not forget to acknowledge my girlfriend, Inez Areta Hardi who always accompany and encourage me whenever I feel tired or wanted to give up.

TABLE OF CONTENTS

STATEMENT BY THE AUTHOR	2
ABSTRACT.....	3
DEDICATION.....	5
ACKNOWLEDGEMENTS.....	6
LIST OF FIGURES	10
LIST OF TABLE.....	11
CHAPTER 1 – INTRODUCTION.....	12
1.1. Background.....	12
1.2. Research Problems.....	13
1.3. Research Question.....	13
1.4. Research Objectives.....	14
1.5. Scope of Analysis.....	14
1.6. Research Limitation.....	14
1.7. Methodology.....	15
1.8. Thesis Organization.....	15
CHAPTER 2 – LITERATURE REVIEW.....	17
2.1. Human Factor Engineering.....	17
2.1.1. Application of Human Factors Engineering to Improve Safety.....	17
2.2. Healthcare and Human Performance.....	18
2.3. Human Error.....	20
2.4. Factors that Influence Human Error.....	21
2.4.1. Fatigue.....	21
2.4.2. Emotional Stress.....	21
2.4.3. Multitasking.....	22
2.4.4. Noise.....	22
2.4.5. Skeleton Crews.....	22

2.4.6.	Culture.....	23
2.5.	Decision Making.....	23
2.6.	Patient Safety	24
2.6.1.	Defining Patient Safety	25
2.6.2.	Patient Safety Practitioner.....	28
2.7.	Human Factors Research to Improve Patient Safety	29
2.7.1.	Parallel perspectives.....	30
2.7.2.	Startling results from the science.....	30
2.8.	Hospital.....	32
2.8.1.	Hospital tasks.....	33
2.8.2.	Hospital functions.....	33
2.8.3.	Hospital classification.....	34
2.8.4.	Hospital facilities.....	35
CHAPTER 3 – RESEARCH METHODOLOGY		38
3.1.	Research Framework	39
3.1.1.	The Swiss-Cheese Model.....	40
3.2.	Problem Formulation	48
3.3.	Observation.....	50
3.4.	Interview	51
CHAPTER 4 – RESULT AND DISCUSSION.....		53
4.1.	Company Overview	53
4.1.1.	Company Profile	53
4.1.2.	Hospital Facilities	55
4.1.3.	Human Resources	56
4.1.4.	Organization Structure.....	57
4.2.	Human Factor Analysis and Classification System.....	58
4.2.1.	Organizational Influences.....	58

4.2.2. Supervision	62
4.2.3. Precondition of workers	63
4.2.4. Acts	65
4.3. Gap Analysis	68
4.4. Problems Discussion	71
4.5. Business Process	75
CHAPTER 5 – CONCLUSION & RECOMMENDATION	79
5.1. Conclusion	79
5.2. Recommendation	80
5.3. Further research	80
