ABSTRACT

DESIGNING AND CONSTRUCTING SWARM ROBOT SYSTEM CASE: COMPUTER VISION

By

Glenn Vialli

Dr. Rusman Rusyadi, B.Eng., M.Sc.

Dr. Ir. Tutuko Prajogo, MSMfge.

SWISS GERMAN UNIVERSITY

The purpose of this thesis project is to develop computer vision subsystem to swarm robot system that consists of mobile robots for corridor detection, robot recognition, and distance detection. This computer vision subsystem for guiding the mobile robots swarm robot system must be implemented in indoor environment. The corridor detection algorithm produce vanishing point that become guidance point for the member who own this algorithm by using line detection as the main process. In order to detect other member, the implementation of object detection is a must. The main process of the object detection is color detection that detecting two color red and green as the indicators of members in swarm robot system. The distance detection is done by calculating the relation of the gap of the indicators and distance between correspond robots. By implementing all of these algorithms the swarm robot system could make a formation in a corridor.

Keywords: Swarm robot, vision, corridor detection, distance detection, color detection

DEDICATION

I dedicate this thesis to God, my mother, my father, my sister, and Francisca Lesmana.

ACKNOWLEDGEMENT

The author gives praise to God for all of His blessings throughout the entire thesis work from the beginning up until the submission of this thesis.

Special thanks to my parents and my sister for all their love and support during the thesis work both mentally and financially.

Also special thanks to Dr. Rusman Rusyadi, B.Eng., M.Sc. and Dr. Ir. Tutuko Prajogo, MSMfge for their guidance, help, and support since the idea of the thesis is still on scratch. Also Pak Cepi for all of his advice and Bu Yannie Sakri Sirat for all the help since entering SGU.

Special thanks to my partner Elmore Eleazar, Gandhi Winata, for the help, support, and ideas along the perilous road to this thesis completion. Also to Stevie Lucardi who gives me many advices for my thesis. And Glenn Sulistio who helps me for the finishing touch of book, Jean Gabriel and Nirmala who tutored me a lot on programming and everything else. And Dennis who help in the last day before thesis defense by supporting me in creating powerpoint. And Tommy Gunawan helps me in many things. And Jeffrey supports me by giving some advices. And Dirga supports me by giving some advices and some logistics. And Daniel, Ryan Bernard, Ryan Saputra, Ryan Iskandar, Adhi Buana, Marshall, Linda Wijaya, Bhagia Rio, Vasilissa, Willy Halim, Ricky Erha, Willmar, who support and help me in many thing. And Aaron Richard, my best friend from elementary until now and also as my team mate. And also Francisca Lesmana, who always cheer me up and make me smile every day.

And for everyone else who is not mentioned here, thank you so much for everything may God bless you all.

Table of Contents

STATEMENT BY THE AUTHOR.....	2
ABSTRACT.....	3
DEDICATION.....	5
ACKNOWLEDGEMENT.....	6
LIST OF TABLE.....	12
LIST OF FIGURES.....	13
CHAPTER 1 - INTRODUCTION.....	16
1.1 Background.....	16
1.2 Thesis Purpose.....	17
1.3 Thesis Scope.....	17
1.4 Thesis Limitation.....	17
1.5 Thesis Organization.....	18
1.6 Thesis Division.....	18
CHAPTER 2 - LITERATURE REVIEW.....	19
2.1 Introduction.....	19
2.2 Swarm Robotics.....	19
2.3 Image Processing.....	21
2.4 OpenCV.....	22
2.5 Color Conversion.....	24
2.6 Morphological Operation.....	25

2.7	Gray Scale	28
2.8	RGB Image Scale	29
2.9	HSV Image Scale	30
2.10	Canny	31
2.11	Houghlines the line detection	32
2.12	Review of existing research and project	33
2.12.1	Corridor Navigation and Obstacle Distance Estimation for Monocular Vision Mobile Robots	33
2.12.2	Leader-Follower Formation Control of Nonholonomic Mobile Robots with Input Constraints	35
CHAPTER 3 - METHODOLOGY		37
3.1	System Features	37
3.2	System Design Overview	39
3.2.1	Webcam	40
3.2.2	Mini PC	41
3.2.3	Arduino IO Shield	44
3.3	Software	46
3.3.1	Installing Xubuntu on Odroid-U3	46
3.3.2	Installing Qt and openCV	46
3.3.3	Configuring Qt and openCV	47
3.3.4	Corridor Detection	48
3.3.5	Robot Recognition and Guidance Point Algorithm	54

CHAPTER 4 - RESULT AND DISCUSSION	62
4.1 General Overview	62
4.2 Corridor Detection Result	63
4.2.1 Vanishing point result	63
4.2.2 Lines Filter Test and Result	65
4.2.3 Corridor Detection with and without Line Filter Comparison Result ...	66
4.3 Robot Recognition with Guidance Point and Distance Detection	68
4.3.1 Range of HSV in Variety of light intensity	68
4.3.2 Color Detection with and without Morphological Operation and fillcolour function	71
4.3.3 Distance Measurement Result.....	75
4.3.4 Implementation of Color Detection for Follower and Distance Detection Result	78
CHAPTER 5 - CONCLUSION AND RECOMMENDATION	80
5.1 Conclusion.....	80
5.2 Recommendation.....	80
