ABSTRACT

CONSTRUCTING SENSOR MODULE FOR ONLINE ENVIRONMENTAL MONITORING

By

Michael Wijanarko

Ir. Arko Djajadi, M.Sc., Ph.D., Thesis Advisor

SWISS GERMAN UNIVERSITY

Environmental sustainability has direct impact to the quality and sustainability of human life. This issue has been discussed lately in many global forums. However, most people tend to neglect it because there is no reliable sources of information that are publicly available to build good environmental awareness. In fact, nearly all human activities will affect the quality of their environment. This thesis is a small step toward this global issue to help giving factual information, by providing solution in the form of Internet of Thing (IoT) module. The results are plotted in graphs to ease the users and can be accessed via web to facilitate people to get new information quickly. The working environment is also important because there will be a difference between indoor result and outdoor result.

Keywords: environment, Internet of Thing, embedded system, WiFi, monitoring, web cloud, sensors, online

DEDICATION

I dedicate this works for God, my beloved family, my advisor, my friends and the future of country I love: Indonesia.

ACKNOWLEDGEMENTS

I wish to thank God for all of His grace and blessing throughout the entire thesis work

I wish to thank my family, especially my parents for their prayers, support both financially and psychologically, and love during the making of this thesis work

I would like to thank Ir. Arko Djajadi, M.Sc, Ph.D, my advisor for his guidance and advice during thesis. I have learned not only about thesis topic but also learn how to work professionally. His dedication and his spirit has taught me how to behave as a professional.

I would like to thank Dr. Rusman Rusyadi, B.Sc., M.Sc., Cepi Mohamad Hanafi, S.S.T. and Tabligh Permana, S.Si. for their guidance and advice so that I can finish this thesis work

I would like to thank Dr. Eka Budiarto, S.T., M.Sc., Yunita Ummiyati, Ph.D. and Prof. Dr. Peter Thiemann for being the accessors for my thesis defense and all inputs they have given to me to revise my thesis report.

I would like to thank all lecturers in Swiss German University for all the help and teachings during my study course in Swiss German University

I would like to thank all my friends from Swiss German University especially Mechatronics batch 2011 and friends from Youth in Christ for all their support, time, story and fun since the start of my bachelor's.

TABLE OF CONTENTS

	Page
STATEMENT BY THE AUTHOR.....	2
ABSTRACT.....	3
DEDICATION.....	5
ACKNOWLEDGEMENTS.....	6
TABLE OF CONTENTS.....	7
LIST OF FIGURES.....	11
LIST OF TABLES.....	13
CHAPTER 1 - INTRODUCTION.....	14
1.1 Background.....	14
1.2 Thesis Purpose.....	15
1.3 Thesis Problem.....	15
1.4 Thesis Scope.....	15
1.5 Thesis Limitation.....	15
1.6 Thesis Organization.....	16
CHAPTER 2 - LITERATURE REVIEW.....	17
2.1 Introduction.....	17
2.2 Theoretical Review.....	17
2.2.1 Wireless Sensor Networks.....	17
2.2.2 Indonesia's Research regarding Online Monitoring.....	18
2.2.3 I2C Communication.....	18
2.3 Parameters of Ambient Air Quality and Their Impact.....	19
2.3.1 Carbon Monoxide.....	19
2.3.2 Carbon Dioxide.....	22
2.3.3 Alcohol.....	23
2.3.4 Liquid Petroleum Gas.....	23
2.4 Other Basic Environmental Parameter.....	24
2.4.1 Illuminance.....	24
2.4.2 Temperature.....	24
2.4.3 Humidity.....	25
2.4.4 Sound.....	26
2.5 Computing and Sensing Devices for Environmental Monitoring.....	27

2.5.1 Arduino Mega 2560	27
2.5.2 Alcohol Sensor	28
2.5.3 LPG Sensor	29
2.5.4 Carbon Monoxide Sensor	30
2.5.5 Carbon Dioxide Sensor	31
2.5.6 Grove – Temperature and Humidity Sensor	32
2.5.7 Grove – Sound Sensor	33
2.5.8 Analog Ambient Light Sensor	34
2.5.9 Power Bank	34
2.6 Programming Tools for Environmental Monitoring	35
2.6.1 Arduino IDE	35
2.6.2 Qt	36
2.6.3 Flexiplot	36
2.7 Networking Tools for Online Environmental Monitoring	37
2.7.1 Wireless Router	37
2.7.2 ESP 8266 WiFi Module	38
2.7.3 AT Commands	38
2.7.4 Internet of Things	39
2.7.5 ThingSpeak	40
2.7.6 Web Server, Database Server and Web Browser	40
CHAPTER 3 - RESEARCH METHODS	42
3.1 Framework for Online Environmental Monitoring	42
3.2 Electrical System Design and Overview	43
3.2.1 Expansion Board for Arduino Mega 2560	44
3.2.2 Sensors	45
3.2.3 Logic Level Shifter 5V-3.3V	46
3.2.4 ESP 8266 WiFi Module	47
3.2.5 Power bank	48
3.3 Software System Design and Overview	48
3.3.1 Flowchart for Data Collection and Networking in Arduino IDE	49
3.3.2 Flowchart for Data Processing in Qt	50
3.3.3 Flexiplot for Qt Data Visualization	51

3.3.4 ThingSpeak for Data Storage and Web-Server.....	51
3.4 Mechanical System Design and Overview	52
3.4.1 Top Part.....	53
3.4.2 Bottom Part	54
3.4.3 Side Part	54
3.4.4 Front and Back Part	55
3.4.5 Plate for Grove – Temperature and Humidity	56
3.4.6 Plate for Grove – Sound Sensor.....	56
3.5 Testing Strategy	57
3.5.1 Calibration and Sensitivity Test.....	57
3.5.2 Data Taking.....	58
3.5.3 Reference Device Required for Testing and Calibration	59
CHAPTER 4 - RESULTS AND DISCUSSIONS	60
4.1 Introduction.....	60
4.2 Function Test	60
4.2.1 Analog Ambient Light Sensor	60
4.2.2 Alcohol Sensor Test.....	61
4.2.3 Sound Sensor Calibration	62
4.2.4 ESP8266 WiFi Module	63
4.2.5 Power bank.....	66
4.3 Testing Result	66
4.3.1 Indoor Test Using Seven Sensors	66
4.3.1.1 Swiss German University – FB305	67
4.3.1.2 Author’s Room.....	70
4.3.1.3 Swiss German University – Chemical Laboratory.....	73
4.3.2 Outdoor Test Using Seven Sensors.....	76
4.3.2.1 Swiss German University – Roof.....	76
4.3.2.2 Swiss German University – Football Field	79
4.3.2.3 Anggrek Loka.....	82
4.3.2.4 BSD Park.....	85
4.3.2.5 UPH Park.....	88
4.3.2.6 Parking Area.....	91
4.3.3 Light Outdoor Performances.....	94

4.4 Calculating the Systematic Error	94
4.5 Calculating the Standard Deviation	95
4.6 Comparison of Analog Module and I2C Module	97
4.7 Mechanical Result.....	100
CHAPTER 5 – CONCLUSIONS AND RECCOMENDATIONS	101
5.1 Conclusions.....	101
5.2 Recommendations.....	101
