SWISS GERMAN UNIVERISTY

There are many cases of criminal where some biometrics factors difficult to be identified and the photo image of a suspect is not available. Therefore, facial sketch recognition system to identify suspects face from sketches is very important to assist the process of investigation. Main purpose of this research is to get the best facial sketch recognition system by comparing the ROC (Receiver Operating Characteristics) curve using local-feature based approach and appearance-based approach. Based on the experiments, the ROC curve proves that local-feature based approach using LFDA framework (Klare et al. 2011) show better recognition result with less error rate than appearance-based approach. Local-feature based implemented inside facial sketch recognition system return between 85% to 90% accuracy rate against good quality viewed sketches.

Keywords: Biometrics, Facial Sketch Recognition, Eigenface, Fisherface, Local Feature-based Discriminant Analysis, Scale Invariant Feature Transform, Multi-scale Local Binary Pattern Histogram

DEDICATION

I dedicate this work to my beloved family, my relatives, my friends, my country Indonesia, and to all Indonesian researchers who dedicate their time, efforts, and knowledge to study and develop facial sketch recognition algorithm.

ACKNOWLEDGEMENTS

First and foremost, thanks to Lord for all of his guidance, blessings, and grace.

Then, I would like to express my sincere gratitude to Mr. Anto Satriyo Nugroho as my thesis advisor. His helps, guidance, and patience play a big role in this thesis works. Also thanks to my co-Advisor, Mr. James Purnama, who always encourage me to finish this thesis.

Not to forget, I would also thank all of IT Department of Swiss German University lecturers and staffs, Mr. Kho, Mr. Charles, Mr. Maula, Mr. Amin, Mr. Randy, Mrs. Rachmawati, Mrs. Mawar and many others, for all of their helps during my study in Swiss German University.

Also I would like to thanks to my family and my girlfriend, which always gives spirit to move forward. Their helps during this research are big support and refreshment for me.

Last but not least, thanks to my friends, who give their time to help me and always comfort, support, and encourage me.
