A Thesis Submitted to the Faculty of

ENGINEERING AND INFORMATION TECHNOLOGY

In Partial Fulfillment of the Requirements

for the

BACHELOR'S DEGREE

in

INDUSTRIAL ENGINEERING

SWISS GERMAN UNIVERSITY

EduTown BSD City

Tangerang 15339

Indonesia

August 2014

Revision after the Thesis Defense on 17th of June, 2014

STATEMENT BY THE AUTHOR

I hereby declare that this submission is my own work and to the best of my knowledge, contains no material previously published or written by another person, nor material which to a substantial extent has been accepted for the award of any other degree or diploma at any educational institution, except where due acknowledgement is made in the thesis.

ABSTRACT

PROTOTYPE APPLICATION DEVELOPMENT FOR MACHINING
OPTIMIZATION USING GENETIC ALGORITHM FOR DRILLING MACHINE

By

Bumi Serpong Damai

Dr. Ir. Prianggada Indra Tanaya, MME.
Dr. Ir. Tutuko Prajogo, MSMfgE.
Dr. Tanika D. Sofianti, ST, MT.

This work talks about the optimization process which is not conducted very well in machining industries. Some of cutting parameters such as cutting speed (v) and feed (f) are chosen only by the operator's sense or by looking at the table. This work has a goal to construct a software application that can be used as an optimization tool, where time and cost will become the target variable in the optimization process. The optimization method process will be using Taylor Tool Life formula and Genetic Algorithm Method, where at the end both of them will be compared with each other.

Keywords: Drilling Operation, Prototype Application, Genetic Algorithm, Taylor Tool Life, Optimization, Cutting Parameter.

DEDICATION

I dedicate this thesis to the most amazing family, my beloved parents who have become role models for me. Moreover, this thesis is also dedicated to my thesis advisor, who never stops encouraging, as well as to fellow readers who might benefit from this thesis.

ACKNOWLEDGEMENTS

First of all I would like to express my deepest gratitude to Allah SWT for every blessing and guidance in my journey of life, especially this last four years.

I would also express sincere appreciation to my thesis advisor, Dr. Ir. Prianggada Indra Tanaya MME, who always has willingness to help and guide me during time of my research. His patience, brilliant ideas and words of motivation were the keys for my achievement. Besides, I would also like to thank Dr. Ir. Tutuko Prajogo, MSMfgE, as the Head of Industrial Engineering Department and other academic staffs for offering never – ending support in my four – year study in Swiss German University. I would like also to thank Dr. Tanika D. Sofianti, ST, MT as my co-advisor who always help and guide me during my work on thesis project. To all lectures in SGU especially in Faculty of Engineering thank you for the lectures for this 4 years.

To my family members my father, my mother, I thank you for your support. I also want to thank my cousins who always support me and be my companion in hard times.

To my fellow FB 303 residents, whom I always working with during our thesis project. Also to my fellow 1wan & Monix Tour, thank you for your support.

Lastly, I would like to thank my Industrial Engineering colleagues at Swiss German University. I thank you all for this 4 years great memories.

TABLE OF CONTENTS

STATEMENT BY THE AUTHOR.....	2
ABSTRACT.....	4
DEDICATION	5
ACKNOWLEDGEMENTS	6
CHAPTER 1 - INTRODUCTION.....	12
1.1 Background	12
1.2 Thesis Description	13
1.3 Problem Statement	13
1.4 Thesis Purpose	13
1.5 Thesis Scope	14
1.6 Thesis Limitation	14
CHAPTER 2 - LITERATURE REVIEW	15
2.1 Introduction.....	15
2.2 General process optimization.....	15
2.3 Genetic Algorithm	17
2.4 Optimization in Machining Operations.....	20
2.5 Optimization in Drilling Operations	22
2.6 State of Art	23
2.7 Concluding Remarks.....	24
CHAPTER 3 - RESEARCH METHODOLOGY	25
3.1 Introduction	25
3.2 General Prototype Development Flowchart.....	25
3.3 Prototype Application Development Process	28
3.4 Product Software Architecture.....	28
3.5 Metal Cutting Theory.....	29
3.5.1 Drilling process	30
3.5.2 Cutting Parameter and Formulation in Drilling Process	30
3.5.3 Process Planning	34
3.6 Prototype Application Functional Elements	34
3.6.1 Determining Basic Information	36
3.6.2 Determining Cutting Parameter and other Constrains	36
3.6.3 Determining Cutting Tool Path.....	37
3.6.4 Finding Machining Time	39

3.6.5 Finding Machining Cost	40
3.7 Optimization by Taylor Tool Life Method	42
3.8 Optimization by Genetic Algorithm Method	43
3.9 Prototype Application Conceptual Design.....	45
3.9.1 Java Programming	46
3.9.2 UML.....	46
3.10 GUI Design	46
3.11 Concluding Remarks.....	52
CHAPTER 4 - DISCUSSION	53
4.1 Introduction.....	53
4.2 Prototype Application Conceptual Design.....	53
4.2.1 Conceptual Design of program Application	53
4.2.2 Conceptual Design of Database	59
4.3 Prototype Application Specification Description	60
4.4 Prototype Application Test Run.....	61
CHAPTER 5 -CONCLUSION AND RECOMMENDATION	73
5.1 Conclusion	73
5.2 Recommendation	74
