# APPLICATION OF UTAUT MODEL ON THE USE BEHAVIOR OF COVID-19 ELECTRONIC HEALTH ALERT CARD (E-HAC) IN INDONESIA

By

Maria Dewi Indrawati Dr. Nila K. Hidayat, SE., MM., Advisor

#### SWISS GERMAN UNIVERSITY

Electronic Health Alert Card (E-HAC) apps is a part of mobile health technology used for Covid-19 surveillance and contact tracing apps in Indonesia. During the initial stage, this mandatory mobile health passport technology is very much expected to promote safer travel experience, however after the second waves of Covid-19, similar pandemic-driven apps are playing a less prominent role than predicted. This study was conducted to confirm the relationships between factors influencing technology acceptance using the unified theory of acceptance and use of technology or UTAUT model and also satisfaction of E-HAC user in Indonesia during Covid-19, which previous research have not given. The research context is the Indonesia travellers who travelled during the pandemic; hence data was collected through an online survey (n=163). Findings from SEM analysis indicate that Performance Expectancy and Facilitating Conditions are important antecedents to intention to use E-HAC and that the construct of Behavior Intention significantly impact Satisfaction in adopting the E-HAC services. This study contributes to all stakeholders such as government agencies, healthcare along with tourism service providers in developing strategies and policies to strengthen E-HAC services as a digital health passport that will boost travelers' confidence and encourage them to use applications to support Indonesia's tourism recovery program.

Keywords: behavioral intention, technology acceptance, technology use, UTAUT, COVID-19 surveillance app, E-HAC, satisfaction

#### **DEDICATION**

To the ones who love me to Pluto and back, Hendra & Aruna.

Mommy loves you.

#### **ACKNOWLEDGEMENTS**

First and foremost, I am extremely grateful to my supervisors, Dr. Nila K. Hidayat, SE., MM. and Dr. Soebowo Musa for their invaluable advice, continuous support, and patience during my master's study. Their immense knowledge and plentiful experience have encouraged me in all the time of my academic research and daily life. I wish to thank the members of my SGU MBA class of 35 for their support, patience and good humour. Their gentle but firm direction has been most appreciated. It is their kind help and support that have made my study in SGU a wonderful time. Finally, I would like to express my highest gratitude to my parents, my husband and my daughter. Without their tremendous understanding and encouragement in the past few years, it would be impossible for me to complete my study.
