The purpose of this research is to identify the impact of Generation Z online consumer behavior on purchase decisions of online food delivery, GrabFood Indonesia. There are five key variables that are expected to influence online consumer behavior: Individual/Consumer Characteristics, Environmental Influence, Product/Service Characteristics, Medium characteristics, and Merchant and Intermediaries Characteristics. This research employs the quantitative method. The information was gathered by distributing questionnaires to 241 Generation Z customers who downloaded and used GrabFood. The data was examined using multiple linear regressions. The questionnaire results are analyzed using IBM SPSS. The study findings reveal that the overall factors exert a substantial and concurrent influence. Specifically, the Merchant and Intermediaries Characteristics significantly impact consumers' food purchasing decisions when utilizing GrabFood delivery services.
