ABSTRACT

THE FACTORS ANALYSIS INFLUENCING THE STAYCATION INTENTION

SWISS GERMAN UNIVERSITY

The COVID-19 pandemic has wreaked havoc on every industry. The objectives of this study is to analyse the factors influencing Covid General Impact, Preference & Attitude and Hygiene & Safety towards Staycation Intention as a rising phenomenon. To know the factors despite the travel banning and lockdowns people still chose to do staycation near home nor those who chose to do staycation in their rural town. The data of this study were collected from 207 respondents. Descriptive Statistical Analysis and Causal Studies were used to assess the collected data. Based on the test result, it can be concluded that there is a significant effect of Covid General Impact, Attitudes & Preferences and Hygiene & Safety on Intention to Staycation. This study also provides few suggestions as the next research could use variables that are not considered in carrying out intention to staycation and should pay more attention to the demographic aspect that may be related to the variable intention to staycation.

Keywords : Staycation Intention, Covid General Impact, Hygiene and Safety, Customer Behaviour, Attitudes and Preferences

DEDICATION

I wholeheartedly dedicate this work for My Future Self, Parents and Family who continually provide their moral, spiritual, emotional and financial support.

My advisor and friends who always gave me inspiration, their words of advice and encouragement which gave me strength to finish this study.

ACKNOWLEDGEMENTS

The first and foremost I would like to express my biggest and sincere gratitude to my mother and father as well as my sisters and all my big family for the countless support and trust that they have given me during my struggling time in making this thesis.

I would like to express my gratitude and give a very special appreciation for my respected advisor, Ms. Hasniati Halim for all the guidance and time she had dedicated to help me to finish this thesis on time. I really value and respected all of your advice.

To all the lecturers and staffs of Swiss German University (SGU) that I could not mention one by one, a very big thank you for all academic and non-academic knowledge as well as assistance that all of you have been giving me during my study in SGU.

Last but definitely not the least, praises to God, the almighty for his showers of blessing, keeping me healthy throughout my research work to complete this study successfully.
