Financial Statements Fraud has caused massive loss for nations. As the Economy grows in Indonesia, financial statement fraud has become a risk in many industries. The massive effects of Financial Statement Fraud has become new concern for accountant and auditor to find some ways detecting Financial Statement Fraud. Messod D. Beneish in his journal The Detection of Earnings Manipulation (1999) had come up with mathematical ratios that can be used to detect earning manipulation in financial statement called MSCORE.

Companies with a higher MSCORE are more likely to have red flags for manipulating. Firms that commit financial fraud will also earn lower future returns. A higher probability of manipulation (MSCORE) earn lower returns. MSCORE has significant ability to predict returns through its ratio components.

This research has an objective to examine the companies that indicated as green flags or red flags will be affected their expected returns using CAR (Cumulative Abnormal Returns). This research focuses on manufacturing company, which is divided into 3 sectors. The result of this research was overall there is a significance relation between MSCORE and expected returns (CAR).

Keywords: Fraudulent Financial Statement, MSCORE, Beneish Ratios, Cumulative Abnirmal Returns, Expected Returns.

DEDICATION

This thesis is dedicated to the people, who love and support me endlessly.

ACKNOWLEDGEMENTS

First of all, I'd like to say thanks to My family, without them I would not become who I am now. For my parents especially for their endless supports, both mentality and financially.

My Thesis Advisor, Miss Imelda Suardi, SE, MAcc, thank you for patiently making time for me and supporting me

My favorite Accounting Lecturer, Mr. Indra Pratama MM, Ak, CA, CMA, CPMA, thank you for guiding me in the hopeless time of thesis process.

To all accounting lecturers, thank you for countless of knowledges you have given me.

My super seven, accounting classmates, I did not have any idea what would my university life be without these people; Rere, Cacah, Greggy, Putra, Emil and Sukhman.

For Controlling team Bosch Indonesia; Mas Hariadi, Kak Nadya and Mas Digo. Especially kak Nadya for being patient to me, sharing the knowledge which I find very usefull to complete my thesis and for giving me so many days-off in order to finish this thesis.

For all friends, who are always being supportive and remind me about my future plan, so I did not give it up.

STATEMENT BY THE AUTHOR	2
ABSTRACT	3
DEDICATION	5
ACKNOWLEDGEMENTS	6
TABLE OF CONTENT	7
LIST OF FIGURES	9
LIST OF TABLES	10
LIST OF APPENDICES	11
CHAPTER 1 - INTRODUCTION	12
1.1. Background	12
1.2. Research Problem	18
1.3. Research Objectives	18
1.4. Research Questions	19
1.5. Significance of Study	19
1.6. Scope and Limitation	20
1.7. Thesis Structure	20
CHAPTER 2 - LITERATURE REVIEW	22
2.1 General Theories	22
2.1.1 Financial Statements.....	22
2.1.1.1 Financial Statements Fraud.....	26
2.1.2 Fraud Detections and MSCORE.....	30
2.1.2.1 MSCORES AND ECPECTED RETURNS	37
2.2 Table of Previous Studies	38
CHAPTER 3 - RESEARCH METHODS	45
3.1 Population and Sampling	45
3.2 Data Sources and Collection	45
3.3 Theoretical Framework	45
3.3.1 Research Process.....	45
3.3.1.1 Dependent and Independent Variables Measurement	48
3.4 Research Model	49

3.5 Method of Data Analysis	49
3.5.1 Testing the Model.....	49
3.5.1.1 Normality Test.....	50
3.5.1.2 Autocorrelation	50
3.6 Hypotheses	50
CHAPTER 4 – RESULT AND DISCUSSION	51
4.1 Statistical Descriptive.....	51
4.1.1 Company Profile.....	51
4.1.2 Classical Assumption Tests	52
4.1.2.1 Normality Test Result.....	52
4.1.2.2 Autocorrelation Test.....	53
4.2 Results and Analysis.....	54
4.2.1 Hypotheses Testing – Primary Industries and Chemical.....	54
4.2.2 Hypotheses Testing – Various Industries sectors.....	57
4.2.3 Hypotheses Testing – Consumer goods sector.....	59
CHAPTER 5 – CONCLUSION AND RECOMMENDATION	62
5.1 Conclusion.....	62
5.2 Recommendation	63
