ABSTRACT

ANALYSIS OF LIQUIDITY AND PROFITABILITY RATIO TO STOCK PRICE
ON GARMENT & TEXTILE INDUSTRIES LISTED IN BEI FOR THE YEAR
2011-2015

By

This study aims to analyze the influence of liquidity ratio (Current Ratio and Quick Ratio) and profitability ratios (ROI and ROE) on Stock Price. The independent variables used are Current Ratio (CR), Quick Ratio (QR), Return On Investment (ROI), and Return On Equity (ROE). The dependent variable used is Stock Price. Sample population in this research is Garment and Textile Company which listed in Bursa Efek Indonesia (BEI) in period 2010-2013. The sample collected using purposive sampling method. A total of 18 companies were determined as samples. While the analytical techniques used in this study is multiple linear regression to test the effect of independent variables on the dependent variable with SPSS program. The results of this study indicate that partially Quick Ratio (CR) has a significant positive effect on stock prices, while Current Ratio, Return On Investment (ROI), and Return On Equity (ROE) have no significant effect on stock prices.

Keywords: Current Ratio (CR), Quick Ratio (QR), Return On Investment (ROI), Return On Equity (ROE), Stock Price.

DEDICATION

I dedicate this thesis for my family and friends, who gave me support and strength to finish this thesis

ACKNOWLEDGEMENTS

Author would like to express gratitude to Jesus Christ for completion of this thesis. Without His grace, blessing and guidance this thesis will not be finish on schedule.

The author would like to thank you to all of my lecture in accounting Pak Yosman, Ibu Imelda, Pak Nurhayadi, and specially to Mr. Indra Pratama, MM, Ak, CA, CMA, CPMA. for all his support, critics, advice, and his time that wasted on me for discussion about this thesis.

The author would like to thank you to author's parents, Drs. Matheus Hukubun and Ir. Olga Margaretha for their support during the research progress.

Thank you for all of my friends and other individual who support me during the process.
