SWISS GERMAN UNIVERSITY

The purpose of this research was to see whether or not Attraction, Accessibilities & Amenities has an impact towards Tourism Destination Development in Tanjung Lesung which is located in Tanjung Jaya, Pandeglang. Therefore, Quantitative data is being used and the Z Test (Rao Purba) with the confidence level of 90%. 100 Questionnaires were spread but 68 was used to conduct the testing. The findings were that Attraction couldn't be used for the Multi-Collinearity test & Hypothesis test due to having heteroscedasticity. Moving forward to the hypothesis test, both of the variable X (Accessibilities & Amenities) do not give an impact towards Tourism Destination Development. The reason why is simply because of the citizens of Tanjung Lesung do not support the idea of change and improvement to Attraction, Accessibilities & Amenities for the better.

*Keywords: Attraction, Accessibilities, Amenities, Tourism Destination Development & Tanjung Lesung.*

## **DEDICATION**

I dedicate this work for the Government, the Citizens of Tanjung Jaya and for this country: Indonesia.

## ACKNOWLEDGMENTS

Herewith, i would like to thank my parents for the support and love. To my auntie, brother and friends to accompany me in Tanjung Lesung while spreading my questionnaires. Also to my advisor Sir Are who supported me with my work. To Olivia & Hanny for reminding me that this won't last long and it will be done soon, for the silly jokes and talks, most importantly to always be there whenever i needed help, you guys are the best! Lastly, i want to thank Steven who helped and supported me since day 1 of my journey. Without everyone of you, i wouldn't have made it this far.

Once again, i thank each and everyone of you who has helped me throughout my thesis.
