## ABSTRACT

### CANDLENUT OIL ENCAPSULATION TO PREVENT OXIDATION

SWISS GERMAN UNIVERSITY

The aim of this research is to protect the omega-3, omega-6, and omega-6 PUFAs in candlenut oil through microencapsulation by spray-drying method. Cold expeller press machine was used for the candlenut oil extraction to maintain the omega fatty acids content. Four wall materials used were HPMC, Alginate,  $\beta$ -cyclodextrin, and gum arabic with the wall materials to oil ratio were 3:2, 1:1, and 2:3 respectively for the microencapsulation. Initially, viscosity of the microencapsulated candlenut oil emulsion was measured. Then, the emulsions were spray-dried to obtain the microencapsulated candlenut oil powder. Moisture content, wettability, microencapsulation efficiency (ME), and peroxide value (PV) for analysis were evaluated as the powder parameters. The data obtained showed that microencapsulation through spray-drying process was successful in protecting the candlenut oil against oxidation. Higher wall materials concentrations lead to higher viscosity and higher ME, except for alginate formulation with 3:2 ratio (A1). Thus, in terms of ME,  $\beta$ -cyclodextrin formulation with 3:2 ratio (C1) showed the best performance with 80.98%, while in terms of peroxide values, gum arabic formulation with 3:2 ratio (G1) showed the best performance with 0.69 meq/kg.

*Keywords: Candlenut oil, Microencapsulation, HPMC, Alginate,  $\beta$ -cyclodextrin, gum arabic.*

## DEDICATION

I dedicate this work to God almighty for which I will not be here without, my family, friends, and my lecturers, who have helped me through thick and thin. I would also like to dedicate my future self, who I trust will grow to be a successful and strong person.

## ACKNOWLEDGEMENTS

The author would like to thank God for His blessings and the opportunities given by Him so that this work could be completed on time, and for the unending support given by the author's parents and family.

The author would also like to thank:

1. Mr. Hery Sutanto, M.Si., as the thesis advisor and Mrs. Della Rachmawati M.Si., as the thesis Co-advisor for their trust and constructive feedback during my thesis work.
2. Reni Marsela for her assistance and emotional support.
3. The Life Sciences and Technology laboratory assistants who helped a lot during the hard times in the laboratory.
4. Meiriska Saga and Tiffany Lie as my research partners in the candlenut team for their assistance and reminders during the thesis work
5. Gabriella P. Gunawan, Vanessa Heriawan, Laurensia Christli, Diaz Marsya P., Karissha Fritzi D., Jevon Ardy S., Jansen Ryadi, Jennifer Sunardi, William, Rebecca H. Wirawan, Sherly Andersen., and Clairia Diamantina for their guidance, laughs, panic, time, and emotions shared.
