ABSTRACT

THE FUTURE OF JOB INDUSTRIES A RESEARCH STUDY IN INDONESIA

By

Cindy Mareyta

Dr. Eka Budiarto, S.T., M.Sc, Advisor

Dr. Ir. Moh. A. Amin Soetomo, M.Sc, Co-Advisor

SWISS GERMAN UNIVERSITY

The purpose of the research is to find prediction of jobs in the future. The methodology used to find the prediction is using web data mining. The data is first collected from websites using web scraping software and then evaluated using k-Means clustering which is one of traditional data mining techniques. There are currently two list of jobs found based on the datasets result from web mining. The first list of jobs specify job that are predicted to extinct in the future. The second result contain list of jobs that are predicted to survive in the future. Many jobs that requires repetitive works such as operators and administrative jobs are predicted to extinct in the future. In order to survive robot revolution, humans have to have continue learning skillsets that are lacking in robots such as creative skillset and character building.

DEDICATION

I dedicate this works for the future of the country I loved: Indonesia

For the school I honored: Swiss German University

For my teachers, families and friends wherever you are

ACKNOWLEDGEMENTS

First of all, I wish to thank Lord Jesus for guiding my journey in life and in Swiss German University especially during the completion of my Thesis. Thank you for sending Your angels in the form of Professors, families, friends and colleagues. Their continuing support, patience and kindness help motivate me to keep going to pursue my goals despite the challenges that might have occurred in my life. Their gentle but firm directions have been most appreciated. They are very understanding especially during this life changing moment that comes up as a turning point in my life. Dr. Eka Budiarto was particularly very helpful and caring in guiding me to complete my thesis. Thank you for not giving up on me. I would like to also thank Dr. Moh. A. Amin. Soetomo. From the beginning, he had confidence in my abilities to not only complete a degree but to complete it with excellence, integrity, love and honor. Thank you for inviting me to be part of the community of Swiss German University, and for showing me great examples in life. I would like to thank my family, especially my brother who always supports me in his prayer. I would like to thank my best friends Michelle, Valen, Erica, Pak Budi, Pak Nam and Pak Rony who fought together with me and reminded me to rely on each other as a team. By continuing to work together we will achieve more in the future. I am thrilled to see how you all grow as great individuals in the future.

I have found my coursework throughout the Curriculum and Instruction program to be stimulating and thoughtful, providing me with the tools with which to explore both past and present ideas and issues. It's been an honor and blessing to be able to learn and meet friends for life here in Swiss German Universities under the supervision of all my Professors.
