ABSTRACT

REDESIGNING A SMALL-SCALED REVERSE VENDING MACHINE TO IMPROVE THE PROCESS AND CONTROL

By

Erikson F. Sinaga, ST., M.Kom, Advisor

SWISS GERMAN UNIVERSITY

The purpose of this thesis is to redesign and rebuild the reverse vending machine with an implementation of barcode scanning as the sorting system and load cell to check whether the drinking container is empty or not. The machine will receive the container from the conveyor station, check the weight, and finally transfer it to the sorting station. The container will be sorted as cans or plastic bottle by the aid of barcode scanning and compare it to database. Furthermore the plastic bottle will be sorted as clear or color. Unrecyclable container will be returned to the user through the outlet passage.

This thesis project focusses on redesign and rebuild reverse vending machine to improve its process and performance. It includes container type accepted, faster processing time, high reliability, sufficient database entries, user interface, and interactive design.

Keywords: Reverse Vending. machine, Barcode, Loadcell, PET bottle, Cans, Barcode Scanning, Database

DEDICATION

I dedicate this works to the almighty God, my beloved family, and Indonesia.

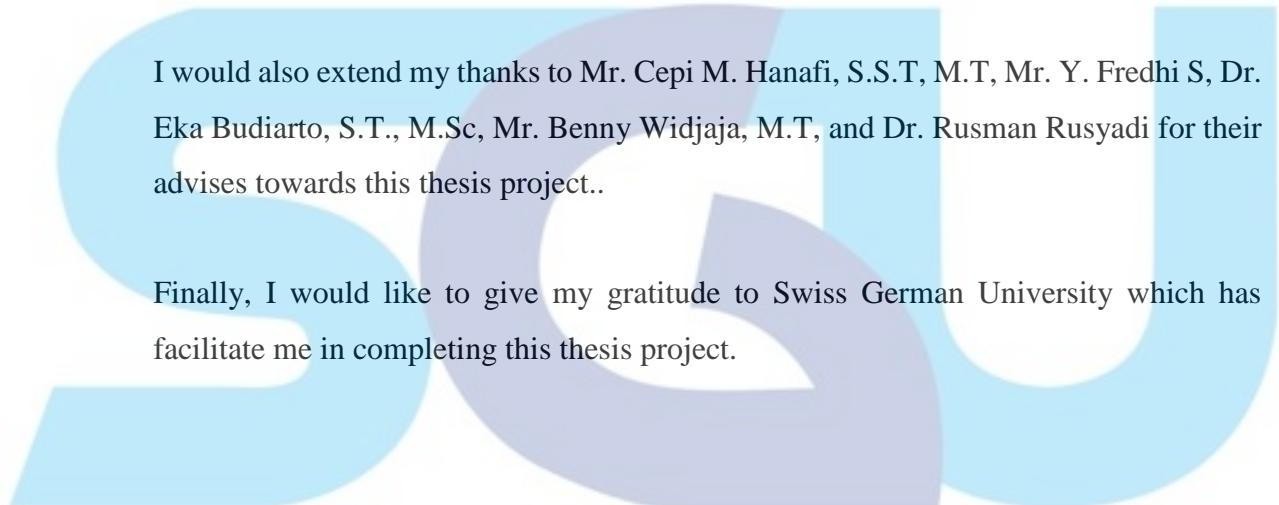

ACKNOWLEDGEMENTS

This thesis project would not be accomplished if the author has to do it by himself. Many parties are involved in this thesis project. First of all, I would like to express his deep gratitude to the Almighty God for the guidance and blessing. Secondly, I would like to thank my beloved family for the unlimited support.

I would like to thank my advisor, Mr. Erikson F. Sinaga, ST, M.Kom for his patience and advices. Furthermore, I would like to thank my friends for their ideas and support.

I would also extend my thanks to Mr. Cepi M. Hanafi, S.S.T, M.T, Mr. Y. Fredhi S, Dr. Eka Budiarto, S.T., M.Sc, Mr. Benny Widjaja, M.T, and Dr. Rusman Rusyadi for their advises towards this thesis project..

Finally, I would like to give my gratitude to Swiss German University which has facilitate me in completing this thesis project..

The logo of Swiss German University features the letters "SGU" in a stylized, overlapping font. The letters are colored in shades of blue and white, set against a background of three overlapping circles in light blue, medium blue, and dark blue.
